Dr. Joshua Lederberg
Professor of Genetics
Stanford University
Palo Alto
California

Dear Professor:

Kindly allow me to approach you for the following information:

My son suffers from an illness which the psychiatrists diagnosed as schizophrenia.

Are you doing any work with the genes that, applied to my son, might cure him? Or do you know any doctor or scientific institute that would do this kind of work?

Thank you for any information you may care to communicate.

Sincerely,

F. Scheer
